

# A functioning Stealth/Wipeout Demo UMD.ISO Tutorial

**IMPORTANT!**

A Physical copy of the UMD Movie Disc is required in order to Carry out this tutorial.

## Introduction

Create a working ISO that when ISO Video Mounted from your Pro VSH Menu, enables the playback of both the Stealth Movie, and the Wipeout Pure Demo game.

1. Insert your Stealth/Wipeout UMD Disc, then enter:  
PRO VSH MENU->USB DEVICE->UMD Disc, then EXIT.

2. Connect PSP via USB, and enter USB Connection in Settings.  
Paste UMD9660.ISO onto your PC, then disconnect your PSP.

3. Enter PRO VSH MENU->USB DEVICE->Memory Stick, then EXIT.
4. Download **UMDKiller V1.2.zip**, re-connect your PSP, and place UMDKiller folder inside your PSP/GAME folder, then disconnect your PSP.

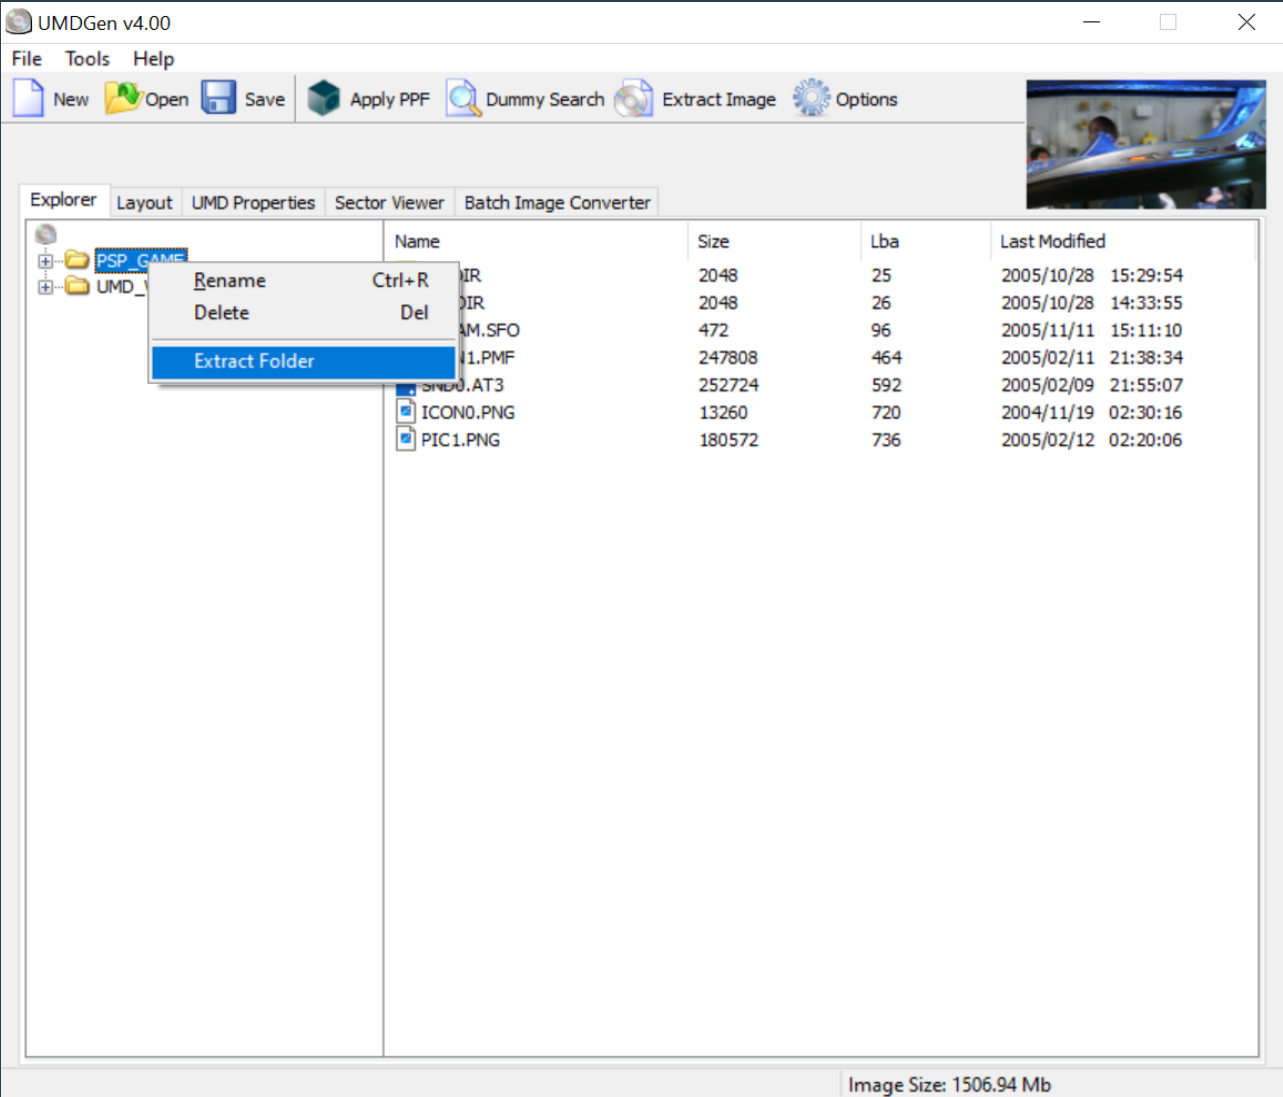

5. Run UMDKiller V1.2 to dump Wipeout Pure (UMD Size 63551). Once dumping has completed...Press [START] to reboot

6. Connect PSP via USB, and enter USB Connection in Settings.  
The ISO will be saved to ms0:ISO/VIDEO/ULES-00232.ISO  
Cut and Paste ULES-00232.ISO onto your PC, then disconnect your PSP.
7. Download **UMDGen v4.00.zip** and open the application, and paste ULES-00232.ISO  
Into the window panel on the right.

In the Explorer panel, right click on PSP\_GAME, and select [Extract Folder].  
Save the extracted folder with your other two ISO's.

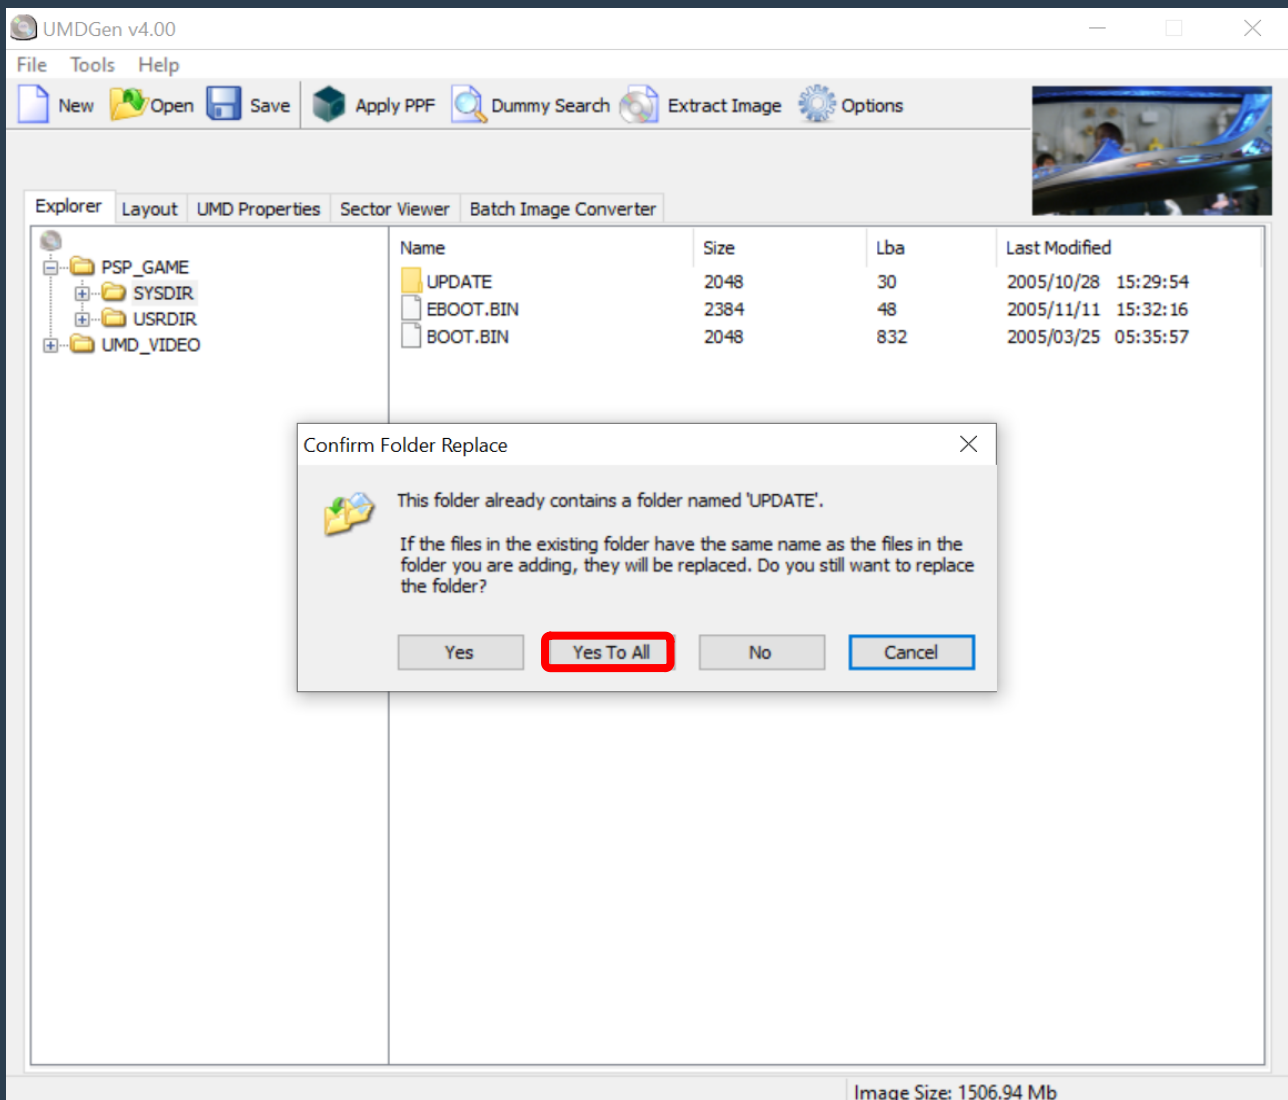

8. Click on the [New] tab, then paste UMD9660.ISO into the window panel on the right. In the Explorer panel, expand [+] the PSP\_GAME folder to reveal the SYSDIR and USRDIR folders

Click on the SYSDIR folder to reveal it's contents.

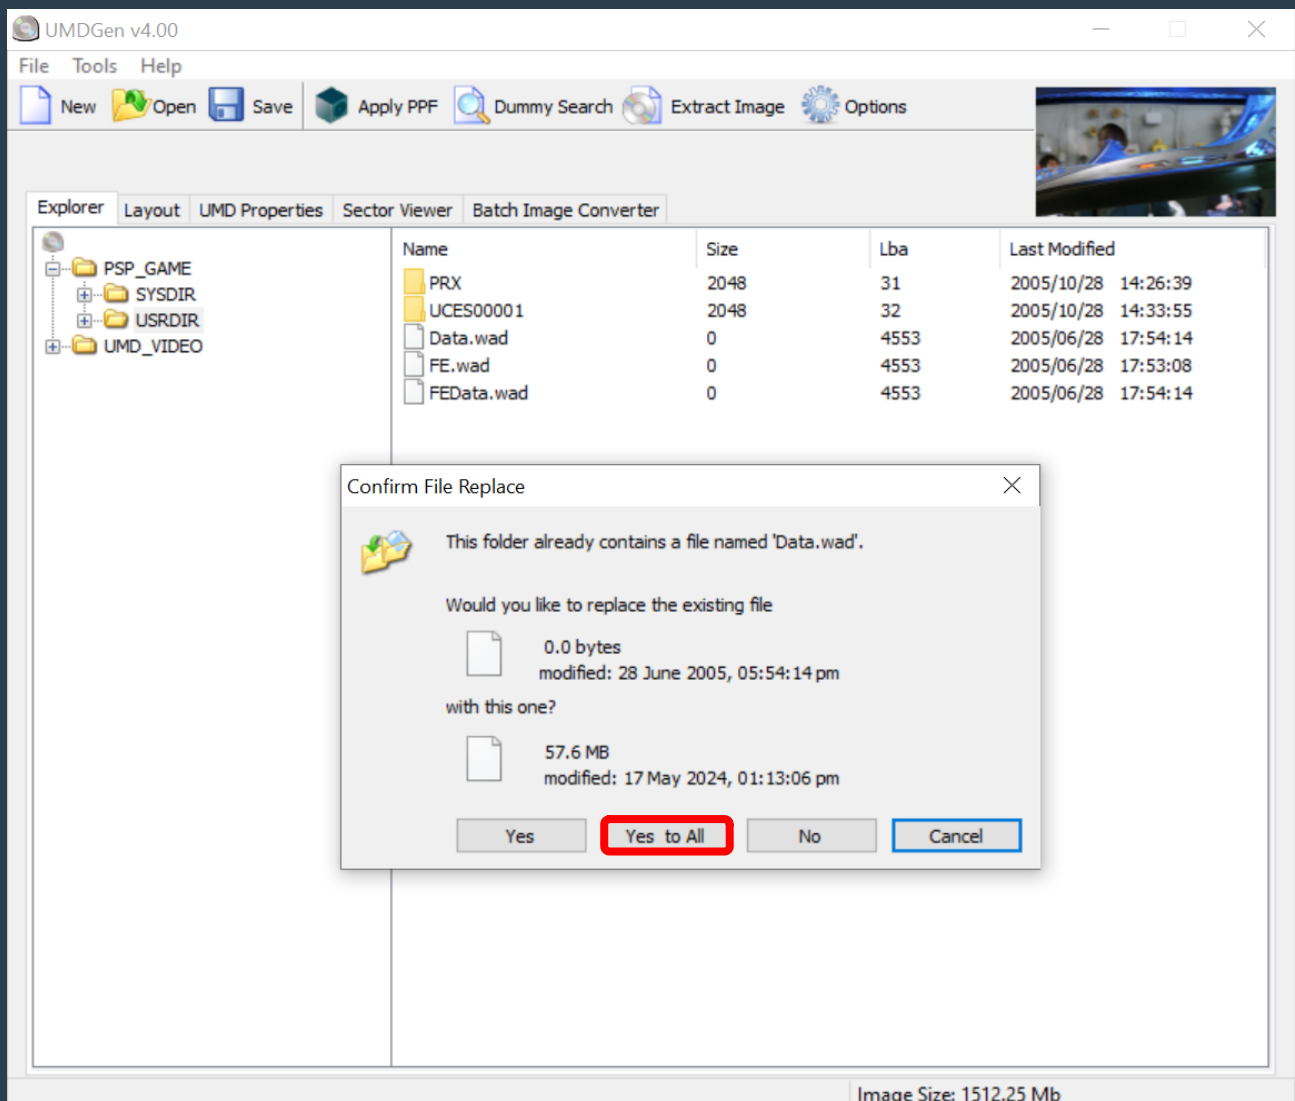

9. Go to the PSP\_GAME folder you extracted, and inside you'll find 2 folders. Open the SYSDIR folder, copy all, and paste its contents to the right window of UMDGen. Confirm [Yes To All] to replace its contents.

10. In the Explorer panel of UMDGen, click on the USRDIR folder to reveal it's contents.

Go to the PSP\_GAME folder again, and open the USRDIR folder, copy all, and paste its contents to the right window of UMDGen.  
Confirm [Yes To All] to replace its contents.

11. Select the menu option [Save], then Uncompressed (\*.iso). Name it [ULES00232.iso] then click [Save].
